Twin Tail Elasticised Absorber 1.6m Lanyard

Twin Tail Absorber Lanyards allow users controlled movement without disconnecting the lanyard. Lanyards are designed to be the flexible link between a harness and attachment point providing you with the maximum safety possible. Absorber lanyards are designed to limit the force or shock load sustained in the event of a fall to under 6kN. Ferno offers a full range of Australian Standards approved energy absorbing lanyards that provide a solution to any height safety scenarios.

Lanyard hardware is steel.

Lanyards come with a scaffold hook tail end and with the option of energy absorber ends: Screw Gate Karabiner (SG), Double Action Hook (DA) or Small Triplock Karabiner (TL)
